Subject: ANTIBIOTICS AND ANIMAL FEED
Auto forwarded by a Rule

I am a concerned citizen. I do not want the meat that I eat to be pumped full of medical antibiotics. I want medical antibiotics banned from animal feed. It is time the FDA did something to protect the citizens. To many drugs are not being thoroughly tested before we are being subjected to them, and to many things are being deemed okay to use, when they are not. Please remove the option of antibiotics in animal feed from farmers and ranchers. I do not want to eat them for dinner.

Thank you for your help and consideration for doing what is right.

Sincerely,

Doris Katz
